Starborn® Deckfast® Fascia System – Epoxy Coated* and Headcote® Stainless*	X	X	X		
SplitStop™ Fascia Screws*	X	X	X		
Simpson Strong-Tie Fascia Board Screw*	X	X	X		

- 2 3/4" or 3" screws can be used with Trex 2x6 product.
- Muro T-Screw M-TX0300SEP listed above is approved for 2x6 decking (can also be used with standard 1" decking as listed above). This screw is collated and can be used with Muro Auto Feed Screw Gun FDVL41 Speed Driver. (note this is not a color match screw)
- All decking products are approved for use with Trex Hideaway Hidden Fasteners, thus all decking products can be routed according to our instructions.
- Simpson Strong Tie Deck Drive DCU Composite Screw in collated versions works with Quik Drive gun.
- * Fascia system screws listed above can only be used with composite fascia profiles, cannot be used with standard thickness decking boards used as fascia. Use Stainless Steel screws near water applications. Refer to manufacturer's instructions for installation methods in addition to Trex installation methods. These screws require the use of a fascia bit that is not sold with screws.
- ** Not for use with sleeper systems. If difficulty is experienced installing the screw, predrill through the deck board with a 5/32" drill bit. Do not predrill into the joist. Refer to FastenMaster literature for more information.
- ***Collated Cap-Tor xd products cannot be used with Trex Escapes.
